

Press release - Monday 14 July 2008

New Mayor update Thoosje Vista Tweaker 2.0. 100% Free

The must have professional power tool for Windows Vista.

We are proud to announce the next Mayor update for Thoosje Vista Tweaker version 2.0. The power tool that lets you tweak and optimize your Windows Vista operating system and already one of the most popular Tweaking and Optimizing Tools on the Internet.

It has some great new features and over 60 tweaks that you can individually apply to tweak and optimize your Windows Vista system without having the knowledge of registry and system settings.

And of course most important the Thoosje Vista Tweaker 2.0 stays absolutely 100% Free for everybody to use and distribute.

New features from previous version

Languages

The Vista Tweaker has a new language feature and supports now 8 languages. Languages supported are: English, German, French, Spanish, Portuguese, Italian, Dutch and Turkish. It has an **add language** feature so it's easy to translate it into your own country language by editing the language XML file. More languages are expected to be released soon like Japanese, Chinese and Russian.

Extra tweaks

The new Vista Tweaker has over 10 tweaks extra. With already over 50 tweaks in the previous version of Vista Tweaker that makes the tool one of the most comprehensive and the first only 100% free professional tool to optimize and tweak Windows Vista on the market.

Backup, import and restore

The new backup and import and restore function makes it easy to save you registry settings and change them in an instant if you need to adjust you computer setting for certain purposes. It also easy to export or reset standard settings to multiple computers a must have feature for administrators.

Support

Vista Tweaker has extended his support. One of the most important extra's is the [new user guide](#) that's available online and will be updated on a regular bases. There is also the support forum on <http://www.thoosje.com/vista-forum> where you can ask questions to our moderators, report bugs and find other relevant information.

For more information and download check our website www.thoosje.com or go directly to the Thoosje Vista Tweaker home page at <http://www.thoosje.com/Windows-Vista-Tweaker.html>
